

Weeden Environments Announces Multiple New Hires

The company hires more employees to support the growth of operations and expand customer services.

“We continue to experience strong growth as we drive forward with our efforts,” stated Kevin Weeden, President. “We’re excited to welcome our latest members, as they will each take on essential roles in strengthening our service.”

Bryce Bramhill, initially hired at Weeden Environments as Purchasing Manager in 2016, is moving into a role as Operations Manager/Inside Sales Manager. Bryce joined Weeden after running his own business in Waterloo, ON for seven years. Combined, he has more than 15 years of agricultural experience both working and living on hog, and poultry operations. Additionally, he worked at a poultry equipment company in Listowel, ON for six years. In his role at Weeden Environments, Bryce will manage purchasing, shipping and receiving as well as oversee the internal operations and processes of Weeden Environments. Also, he will work collectively with the technical service support team to ensure

all customers are completely satisfied.

Mark Lingard joins Weeden Environments as the Service Manager. Mark brings a wealth of experience to the Weeden team as he spent numerous years running his own company and working for Tim Horton Children’s Foundation as the Property and Asset Standards Manager for seven camps throughout Canada and the US. Mark attended post-secondary education in the United Kingdom for physics and completed a surgical instrument course. He then moved to building and renovating homes where he specialized in custom furniture and became a master cabinet maker. Mark’s in-depth knowledge of

the agricultural and technical aspects of Weeden Environments, will allow him to maintain Weeden’s high quality customer service through installing, repairing and servicing poultry equipment.

Kevin Thompson will oversee Central and Eastern Ontario and the Niagara region as the Territory Sales Manager for Weeden Environments. Kevin's farming experience began early as he was raised on a dairy farm and eventually switched to growing broilers 14 years ago. In 2011 his family broiler operation successfully converted their broilers to antibiotic free. Kevin received his Honours Bachelor of Science in Microbiology from the University of Guelph and he also spent 4 years gathering data and administering protocols in poultry research at Maple Leaf Foods AgResearch, now Nutreco Canada AgResearch.

With Kevin's lifelong experience in farming combined with his deep educational background, Weeden Environments is thrilled for him to join the team.
